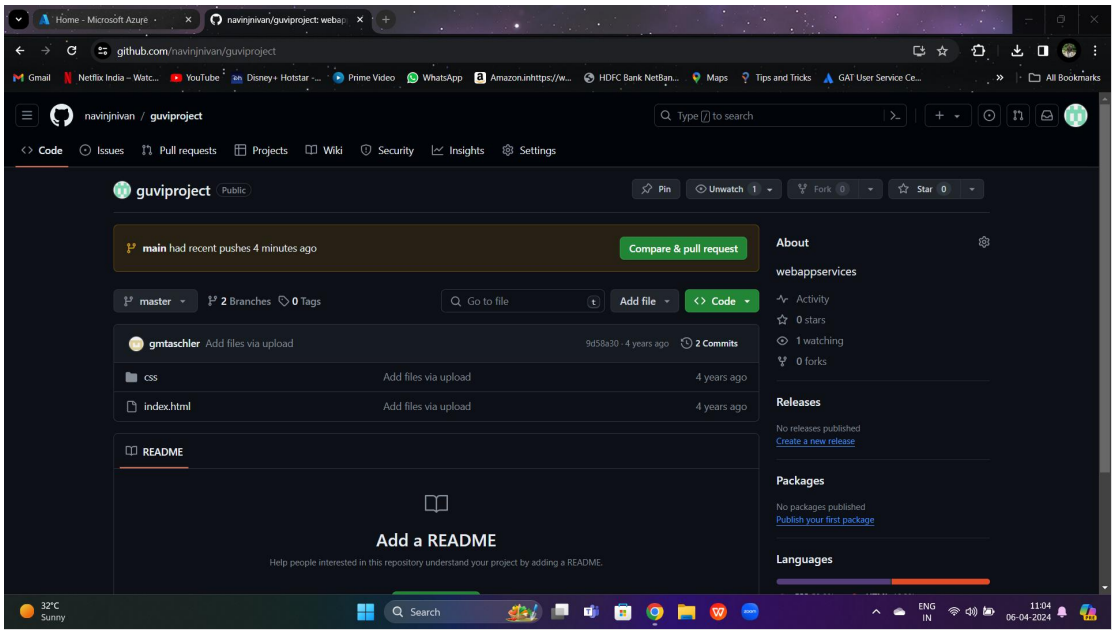
Basic web application using Azure App Service.

I have created a github repo named guviproject and cloned a css and html public repo to it.

https://github.com/navinjnivan/guviproject.git



I am using this repo for deployment in web app services.

And attaching screenshots below how I configured web app using azure app services.

Zone redundancy
An App Service plan can be deployed as a zone redundant service in the regions that support it. This is a deployment time only decision. You can't make an App Service plan zone redundant after it has been deployed. Learn more
Zone redundancy
Enabled: Your App Service plan and the apps in it will be zone redundant. The minimum App Service plan instance count will be three.
Disabled: Your App Service Plan and the apps in it will not be zone redundant. The minimum App Service plan instance count will be one.
