

# Azure Storage account with Table storage.

Via storage accounts I have created azure table storage

The image shows two screenshots of the Microsoft Azure portal. The top screenshot displays the 'Storage accounts' page, which is currently empty, showing a message: 'No storage accounts to display'. Below this message is a 'Create storage account' button. The bottom screenshot shows the detailed view of a storage account named 'navintablestorage'. The account is located in the 'eastus' region and is configured with 'Standard' performance, 'Read-access geo-redundant storage (RA-GRS)' replication, and 'StorageV2 (general purpose v2)' account kind. The provisioning state is 'Succeeded', and it was created on 4/6/2024 at 7:15:48 PM. The 'Properties' tab is selected, showing details for 'Blob service' (e.g., Hierarchical namespace is Disabled, Default access tier is Hot) and 'Security' (e.g., Require secure transfer for REST API operations is Enabled).

Name Type Kind Resource group Location Subscription

**No storage accounts to display**

Create a storage account to store up to 500TB of data in the cloud. Use a general-purpose storage account to store object data, use a NoSQL data store, define and use queues for message processing, and set up file shares in the cloud. Use the Blob storage account and the hot or cool access tiers to optimize your costs based on how frequently your object data is accessed.

Storage account metrics

The data provided is regularly updated about 2-4 times a day and published hourly. If your account has extremely large objects, it may be over a day between updates.

Microsoft Azure portal interface showing the 'Add entity' dialog for a storage account named 'navintablestorage'.

The dialog displays the following properties:

Property Name	Type	Value
PartitionKey	String	Navin
RowKey	String	J
Employee_ID	Int32	100
Name	String	Navin
Course_name	String	Cloud computing

Buttons: Add property, Insert, Cancel

The background shows the Azure Storage browser with a table named 'demo' selected.
